

GABOR ULENIUS

FULL STACK DEVELOPER | REACT | TYPESCRIPT | NODE.JS | AZURE | AI

Espoo, Finland | +358 44 989 4822 | gaborulenius@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [The Explorer on Google Play](#)

PROFESSIONAL SUMMARY

Full Stack Developer building cloud-native healthcare, data, mobile, and AI-powered products. At Tieto Caretech, work as the primary developer for a healthcare application across React, TypeScript, Node.js, GraphQL, PostgreSQL, Azure, Terraform, Docker, Kubernetes, Elasticsearch, and Databricks. Independently designed, built, and published The Explorer, an offline-first GPS field research app. Also developing Neural Decompiler, a Python/PyTorch mechanistic-interpretability research project using TransformerLens and Pythia. Experienced in end-to-end product development, cloud infrastructure, automated testing, CI/CD, and AI/LLM-assisted workflows.

TECHNICAL SKILLS

Frontend & Mobile: React, Next.js, React Native, TypeScript, JavaScript, HTML5, CSS, Material UI, Tailwind CSS, Jotai, Expo, EAS

Backend & APIs: Node.js, GraphQL, Kotlin, PHP, C

Cloud & DevOps: Microsoft Azure, AKS, Azure Functions, App Service, Key Vault, Terraform, Docker, Kubernetes, Azure DevOps, CI/CD, Cloudflare, Databricks

Data & Search: PostgreSQL, MySQL, MongoDB, MariaDB, Elasticsearch, Redis, Supabase

Testing & Developer Tools: Playwright, Jest, Cypress, Detox, Postman, Git, GitHub, GitLab, VS Code, Android Studio, Xcode

AI & ML: Python, PyTorch, TransformerLens, Pythia, mechanistic interpretability, LLM experimentation, GitHub Copilot, OpenAI Codex, Claude, Cursor

PROFESSIONAL EXPERIENCE

Full Stack Developer | Tieto Caretech, Espoo | Jun 2023 - Present

- Primary developer for a cloud-native healthcare application, owning day-to-day development, maintenance, cloud infrastructure, CI/CD, environments, deployments, releases, and troubleshooting.
- Contribute to HUS DataLake, improving access to healthcare data for Finland's largest hospital district.
- Build full-stack features and cloud infrastructure with React, TypeScript, Node.js, GraphQL, PostgreSQL, Azure, Terraform, Docker, Kubernetes, Elasticsearch, Databricks, and Azure DevOps.
- Build and maintain CI/CD and infrastructure-as-code workflows across cloud development environments.
- Built an AI-powered proof of concept for HUS New Children's Hospital in Helsinki, applying medical document analysis to explore symptom-based healthcare workflows.
- Placed second out of around 27 teams in an AI hackathon, building an AI-assisted emergency-department waiting-time and communication concept with a three-person team in four hours.

Junior Full Stack Developer | Anyhau, Espoo | Dec 2022 - Apr 2023

- Contributed to a greenfield marketplace application for animal-related services, including provider listings and customer booking flows.
- Developed frontend and backend features using Next.js, TypeScript, Material UI, and MongoDB.

SELECTED PROJECTS

The Explorer - Offline-first GPS field expedition app | Nov 2025 - Present

Tech: React Native, TypeScript, Expo/EAS, MapLibre, Supabase, Auth0

- Independently designed, built, and published an Android app with offline GPS tracking, cloud sync, team features, geospatial exports, photos, voice memos, and a companion web app.

Neural Decompiler - Mechanistic interpretability research | Sep 2026 - Present

Tech: Python, PyTorch, TransformerLens, Pythia

- Open-source mechanistic-interpretability research investigating transformer computations through reproducible Pythia experiments, evaluation, and causal interventions.
- Built research methodology and instrumentation for evidence tracking, falsification, and reproducibility.

EDUCATION

Computer Programming | Hive Helsinki, Helsinki | Oct 2021 - May 2023

Hive Helsinki Alumni. Project-based, peer-learning software development focused on teamwork, problem-solving, and self-directed learning.

CERTIFICATION

Microsoft Certified: Azure Fundamentals (AZ-900)

LANGUAGES

Hungarian: Native | **English:** Fluent | **Finnish:** Fluent
